

ENGINEERS SUPPORT

In today's expanding global market place, companies are under increasing pressure to offer products and systems that meet a variety of international standards.

This can be particularly difficult for engineering professionals who are required to adapt their skills to handle specifications which may be less familiar to them. Whilst GFI Enterprises Ltd is a product supply company, our experienced staff are only too happy to help engineers gather information on potential manufacturers and products to facilitate the ultimate selection of the most suitable products.

Our Experience

GFI have expert in-house staff with many years experience of product supply to the Oil, Gas and Petrochemical sectors worldwide.

Multi Disciplined

Our ability to support our clients with both Mechanical AND Electrical equipment with most International specifications makes us stand out from our competitors. We are here to help with any products you may require — Regardless of type, specification or origin.

GFI Enterprises core strengths include, but are not limited to:

- **International Specification Products -**
 - European Specification
 - North American Specification
- **ATEX Hazardous Area Products**
- **Electrical Wire & Cable**
- **Valves & Actuators**
- **Pumps**
- **Hard to find items**
 - Obsolete items
 - Relocated companies
 - Foreign Manufacturers
 - Manufacturers lost through acquisition

The global centre of excellence for the supply of electrical & mechanical equipment, spares & materials
